in their communities.

Company Overview

Nature Bio Foods (NBF), a pioneer in the Organic business in India, has come a long way to establish itself as the leading global organic food ingredients company. NBF is also well recognized globally for its remarkable performance, quality products and trust worthiness.

NBF is a subsidiary of LT Foods Ltd (LTF). With more than 70 years in the rice business, LTF is one of the most experienced Basmati Rice Companies in the world. NBF successfully controls all the Organic business operations from Farm Production, Manufacturing to Packaging and Marketing.

OUR VISION

To lead the organic ingredient supply chain with a strong focus on Sustainability and Finest Processing Output

OUR MISSION

Global leaders in delivering authentic organic ingredients to the world of consumers by practicing sustainable techniques of supply and production that secures a growing future for all the members.

More than two decades of committed work has enabled NBF to extend organic cultivation to thousands of hectares of land. Farming families from the foothills of the Himalayas to the Central and Southern part of the Indian subcontinent have joined hands with NBF to convert their land for Organic production in the diversified climatic and soil conditions.

A strong commitment from NBF to the farming community for Organic agriculture and High Quality Production and Quality Control Systems, has resulted in the success and acceptance of NBF Organic ingredients with brand and industries across the world.

Our Group Companies

Nature Bio Foods Ltd. - India

Nature Bio Foods BV - The Netherlands

Nature Bio Foods Inc. - Americas

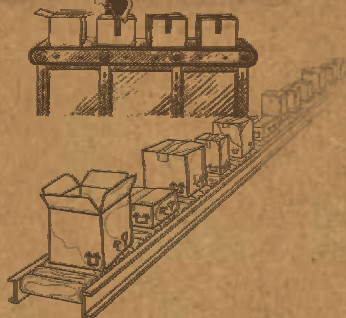

Ecopure Specialities Ltd. - India

Bonne Nature SMC Ltd. - Africa

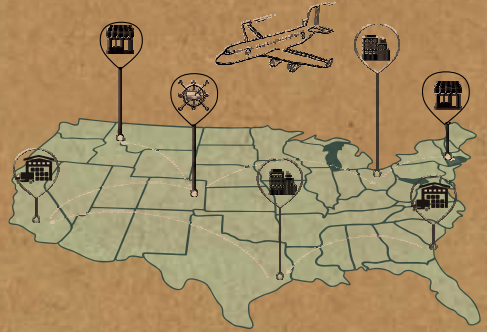

Nature Bio Foods BV Europe

Nature Bio Foods BV offers a vast bouquet of quality organic food ingredients for Brands and Industries sourced from sustainable organic farms of India, Africa, and other Asian countries. Just In Time solutions with state-of-the-art infrastructure base of cleaning and packaging in the Netherlands and other distribution hubs in Germany and Italy make a holistic, integrated & sustainable business model in Europe.

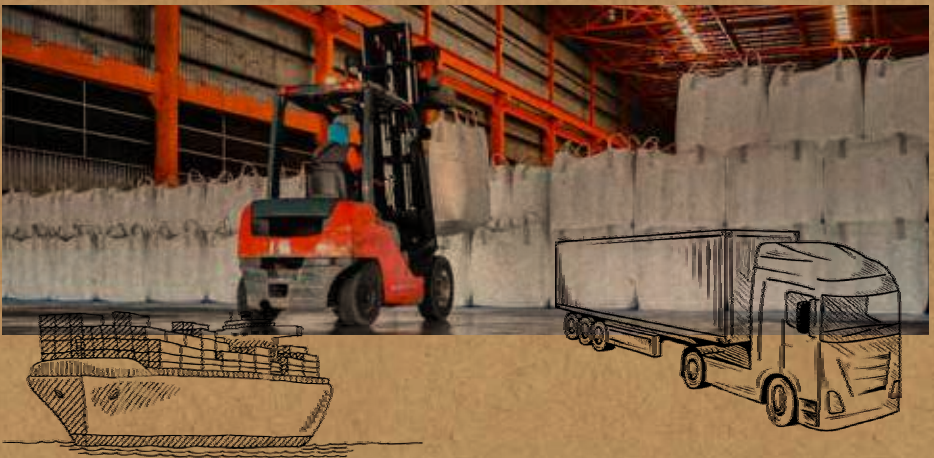

Nature Bio Foods Inc. America

Leading the entire organic supply chain from India, Africa, Europe, Southeast Asia and South America, Nature Bio Foods Inc provides 100% organic food and feed ingredients to American Organic Brands and Industries. Entwined with local distribution networks throughout the USA with offices in New Jersey and California NBF Inc facilitates just-in-time deliveries with a robust logistics network and strategically located warehouses across the states of California, Minnesota, New Jersey, Virginia and Florida.

Nature Bio Foods can guarantee full traceability, authentic quality, organic integrity and competitive prices while ensuring effective control of food safety and food quality issues, minimizing the potential for any delivery, quality or certification risks. Besides a well connected sourcing network, local distribution channels brings us closer to our customers, who know that we have immediate availability and flexibility to supply from one pallet to a full truck loads. We are a farm-to-factories business, owning the delivery of products right from the gates of the farmer til they're safely delivered to our buyers.

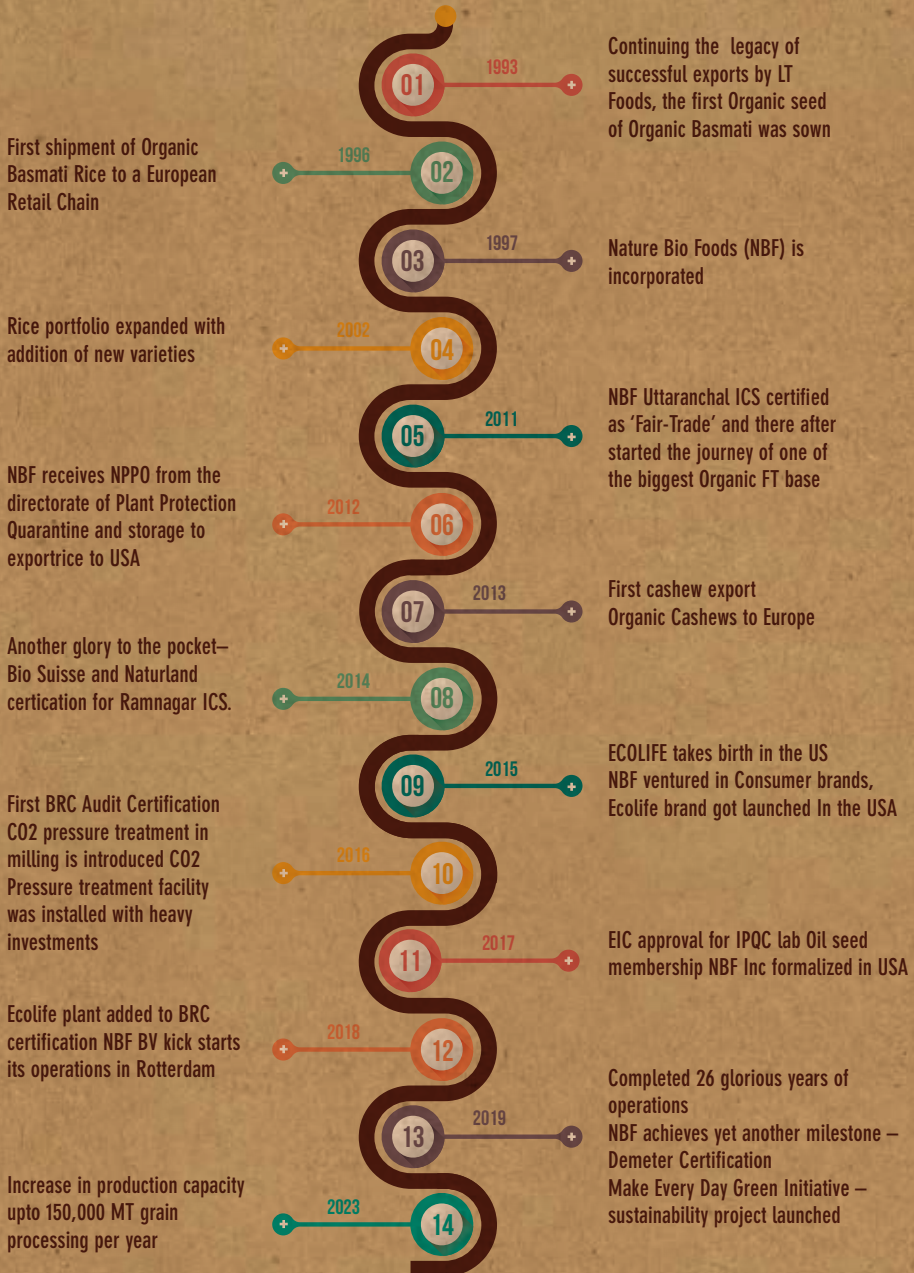

Nature Bio Foods Africa

NBF Africa contributes to offer additional economic opportunity to the thriving communities growing organic produce and bringing it to the Western world responsibly. Projects in Uganda and Benin produce multiple oilseeds and spices from remote villages of Africa. NBF Africa will continue to strive for success and growth for the people, the company, and the planet.

NATURE BIO FOODS JOURNEY

QUALITY: THE KEY TO OUR SUCCESS

At Nature Bio Foods, quality standards are maintained from the beginning to end.

PROCESSING UNITS

Our facilities operate through state-of-the-art processing units including Colour Sorters, Metal Detectors and X Ray Scanners. We use Cold Treatment and CO² Pressure Treatment to protect against any kind of infestation, thus ensuring a supply of good quality Organic products.

QUALITY ASSURANCE

We continuously monitor and check the quality standards as per given guidelines through our in house labs. Before the consignments are exported, it is run through inspections internally as well as through agencies like SGS, Eurofins, Geo-Chem, TUV, Neutron, Enviro care, Cotecna, Nawal, Reliable etc.

QUALITY STANDARDS

We cater to quality parameters as per various agencies like BRC, IFS, HALAL, MARS, FSSAI and other Organic Standards

- CO² treatment plants
- Cleaning and Processing facilities at Rotterdam and US.

Experienced team

Quality is the mantra followed by our leadership team and they believe in constantly mentoring the company employees to attain and maintain the highest benchmarks.

ORGANIC TRACEABILITY

NBF ensures complete Organic Traceability for our consumers by following stringent processes and systems to ensure that all products and services are in total compliance with all regulatory requirements. Our projects are fully integrated and controlled from seed to shipment.

Model: We work closely with our farmers through the network of village level workers (Organic Friends) supported by the team of Agriculture Extension officers (Agri-Graduates / Post-Graduates) with strong technical knowledge of the subject following the principle of **“Prevention is better than cure”**.

Project locations: Located in the remotest areas with small and marginal farmers, with minimum mechanization, the risk of chemical contamination becomes very low.

Quality check: The harvested produce is transported to our warehouse and further to the processing unit. The produce is carefully monitored and checked by our quality experts under the supervision of highly qualified professionals.

Fair Price: Market support to all the farmers with fair price, around the year, has been helping in sustainable development of the farming community, which has developed into a strong relationship.

Advantage: Close relationship with our stakeholders has resulted in securing Quantity with Quality and Supply Chain Traceability

The entire process facilitates produce of each season, Quality of Production, Organic Processing, Packaging, Storage and Distribution to be traced back to its origin.

BUILDING TRUST BETWEEN CONSUMERS AND FARMERS

Core to this is the Nature Bio Foods business model based on a sustainable concept of linking prosperity with social, product & economic values. We sum it up as 'making the best possible organic products in the nicest possible way'. The relationship builds itself on its business partners and stakeholders - buyers and farmers in an open ended network. Through this open network we give buyers a chance to come and visit these farms at any time of the year. Dedicated output purchase from the farmers is the responsibility of the brand owners, which has helped them to grow.

FARM TO FORK

INTEGRATED ORGANIC SUPPLY CHAIN

Developing a strong chain of 100% certified Organic food from the remotest Farming Families to the World of consumers

SUSTAINABILITY: AN INTEGRAL PART OF OUR BUSINESS

As a responsible corporate, the company continuously engages itself in the upliftment of the communities it is involved with. Our sustainability strategy aims to significantly enhance value creation for the nation through superior 'Triple Bottom Line' performance. NBF is committed to the welfare of the wider community in areas such as education, health, livelihood, rural development, water conservation & environment protection. Farmers are getting empowered by the economic & social stability provided by Fair Trade. Currently, we have 10 registered projects with Fair Trade involving more than seven thousand farming families and 2 projects under FTSA project

covering around one thousand farming families. We have received a premium of around 80 million for socio-economic development of the associated farming families.

Some of the projects: We are working with the Government of India under

Public Private Partnership for the implementation of Integrated Watershed Management Program with a budget of INR 80 million at one of our project locations. NBF is continuously engaged in promoting economically and environmentally sustainable renewable sources like

solar streetlights, solar panels, bio-gas units etc. for household and community consumption.

Farming resources: To promote convenient farming operations, NBF provides support to maximum farmers yearly, by distributing various farm implements like Spray Pump, Hand Weeder, Drums and Bio-inputs. We give special emphasis to our relationships with farmers as we believe our farming partners are the real winners as they produce the finest organic products for our global consumers.

Women Empowerment & Livelihood:

We empower women to make informed choices and provide access to livelihood options, promoting collective strength through self-help groups and organising skill development training for women artisans.

Working towards building a healthier community: We are primarily engaged in improving the quality of health, through easy accessibility of health services to the community. We are also working towards making rural villages open defecation free by constructing household toilets under our 'preventive healthcare & sanitation program'.

Leveraging learning, nurturing lives:

As a step towards educating a nation, NBF is working on developing School Infrastructure and providing education in various parts of the country.

Building Rural India through Infrastructure Development: With the vision to change the face of rural communities, the company has developed rural infrastructures such as roads, community centres, drainage systems, culverts etc
